Games For Love is heavily data driven so that we can understand the depth of analytics that our impact is making on a global scale. $4.13 represents the average dollar amount for Games For Love to reach and impact 1 person through our six different programs.

Games For Love's is a 501(c)(3) dedicated to easing suffering, saving lives, and creating sustainable futures for children. We do this through six programs that are working in tandem
with each other to create a community of support to children for life. Each program is designed with a specific purpose to achieve significant impact on their own, but the power of Games For Love’ Program Ecosystem happens once a child traverses programs sequentially, and grows in their impact to a child the more programs they are able to take part in. Our programs are set up in a way that allows our programs to create a pathway into the future to create sustainability, and also as a unique ecosystem that makes our programs welcoming at any point since each program is based on age-ranges.

Flow of Program Ecosystem

Whenever a donation is made to Games For Love, may it be $1, $100, or $1,000,000 the breakdown is the same each time since our funding is based on percentages for support and cost to run our programs.
Currently, we impact children with more than $0.85 cents of every dollar. With the goal to impact children with more than $0.90 of every dollar in 2021. Our goal is to keep growing our impact numbers while decreasing our admin and overhead costs. One of the ways we have been able to focus on impact is to reduce traditional infrastructure costs by limiting our costs of facilities to a single office and a warehouse, while receiving the generous support of in-kind donations to utilize software, and hardware.

The Return on impact per program per child is as follows:

<table>
<thead>
<tr>
<th>Program</th>
<th>Percentage</th>
<th>Cost per child</th>
</tr>
</thead>
<tbody>
<tr>
<td>GFLX</td>
<td>36.30%</td>
<td>$1.64</td>
</tr>
<tr>
<td>1UP LifeBridge</td>
<td>28.40%</td>
<td>$100</td>
</tr>
<tr>
<td>Kids of Code</td>
<td>8.80%</td>
<td>$5</td>
</tr>
<tr>
<td>GFL Scholarships</td>
<td>9.80%</td>
<td>$500</td>
</tr>
<tr>
<td>Interns Int’l</td>
<td>2.00%</td>
<td>$100</td>
</tr>
</tbody>
</table>
Based on these figures, we are able to create a comprehensive data set to look at the total impact we are able to make with increased funding as we continuously evaluate our data and analytics for how we reach children, and then how we can increase our cost effectiveness over time.

For example, we buy in bulk when we can to save on costs, and if we can't buy in bulk, we buy bundles. We are able to have such an effective and competitive return on impact because we understand our areas of expertise through panels of experts, advice from advisors, directors, and other professionals to help us as we do not rest on laurels, but continuously innovate.

We believe in innovation as a charity and that we must remain on the front lines of technology as early adopters to both understand, and grow long-term. We use technology to leverage automation by any means necessary to free up our time to focus on what really matters.

Each of our Departmental leads is able to see the bigger picture, while also understanding the depths of our trenches to ensure efficiency, while holding a continuous vision for progress and achievement.

The consistent goal that is put forward is constant progress to be obsessed with positively impacting the lives of children through our ecosystem.

Our vision is to reach 10 million children within 5 years. To do this, we must reach more than 2 million children each year and receive approx. $10 million dollars in total funding.
Here is a look at how that is possible by taking the total amount raised by Games For Love each year, and how it is budgeted, with the impact per child cost to give us our final numbers for how we can reach 2.42 million children per year.

We have learned many things as we innovate and grow to be able to help children, but one of the biggest lessons we have learned is that the true measure of success is not how much we make, but that the true measure of success is how much we are able to give.

On behalf of the Games For Love team, the children, and people we impact, and our community; thank you for your support as we make a way for children, to give them hope, and a future through our love. “To do the impossible, we must believe nothing is.” -Nathan Blair, Founder, Games For Love.
